

Cross-Border Data Transfer & Jurisdiction Policy

Corporate Governance Policy Manual | Document Ref: **POL-CBD-02** | Version 3.4

Section 1.1: Data Residency Requirements

All customer personal data, telemetry, and business records must be stored and processed within data centers located inside the European Economic Area (EEA) or countries recognized as possessing adequate protection by the European Commission.

Section 2.1: Transfer Mechanisms and Consent

Transfers outside designated regions require prior written customer consent, executed Standard Contractual Clauses (SCCs), and a documented Transfer Impact Assessment. Vague worldwide processing clauses without customer consent are strictly non-compliant.
